

Dr Koldzic Milija

Born: 1950, Priboj, Yugoslavia.

1974 Bachelor of Engineering Science
1990 Master of Science
1999 Doctor of Science

All degrees obtained from the Faculty of Mechanical Engineering, University of Belgrade, Yugoslavia.

Since its establishment in 1999 until his premature death in June 2006, Dr Koldzic has been very active and frequent visitor of the MIRCE Akademy. Extremely fruitful research collaboration has been established in the areas of reliability testing, which included the planning of experiments, data collection, data analysis and estimation of the parameters of the life distributions of the mechanical components. The initial target for the application of the research performed was testing and design of the formula 1 racing cars, as apart of the research activities of the [FIRE Centre](#) of the MIRCE Akademy.

On 6 December 2006, Dr Koldzic was posthumously awarded the title of the Science Fellow of the Akademy in the recognition of his original contribution to the development of the

"Method for the determination of the Weibull parameters for the life distribution of the components of the mechanical systems based on the accelerated multi-factorial experimental testing"

The Akademy shall continue researching and applying the Method proposed by Dr Koldzic through its Master and Doctoral Diploma Programmes in Mirce Mechanics, under the Scholarship scheme established in his memory
