

Justin Taylor

Justin graduated from University of Wales, Swansea in Materials Engineering.

He joined Independent Polymer Technology Ltd, in Telford, UK in 2008 with experience gained from previous roles including: managing the development and construction of a bespoke production facility to manufacture a range of high-pressure hoses for the oil and gas industry. Justin has also managed the laboratory and the materials at Tronic Ltd, providing in-house technical support on sub-sea electrical connectors and as a senior consultant at Rapra Technology he delivered training courses in the UK and in Europe.

Justin has particular expertise in the field of environmental stress cracking of amorphous thermoplastics and has publications on ESC of polycarbonate in binary liquid mixtures.
