

Nada Stanojevic, BEng, MEng

Nada has over 20 years of experience in diverse projects for different industries in the fields of mechanical engineering, transport, and energy. She is experienced in working with both small and large national and international project teams comprised of experts from various disciplines. Nada launched a professional career in the Faculty of Mechanical Engineering at Belgrade University and joined consulting company Institute IIPP to apply engineering background in a business context. At the moment, she holds the position of Institut za Istraživanja i Projektovanja u Privredi (IIPP) Executive Manager.

Passionate, not only about mechanical engineering but also about technical development and innovations, especially in the field of asset management, Nada represents Serbia and Montenegro in the General Assembly of the European Federation of National Maintenance Societies.

At the same time, her dedication for the further development and application of science in the broad field of mechanical engineering, traffic and energy is fulfilled through the position of the Executive editor of an International Journal of Applied Engineering Science (JAES) highly indexed in global scientific databases.

At MIRCE Akademy she demonstrated expertise in enterprise architecture and the ability to develop and manage effective architectures, as well as a deep understanding of business analysis within project management, enabling identification of business needs and facilitation of successful project outcomes. Her advanced knowledge of identifying and mitigating security threats ensures the overall protection of our systems and networks. In summary, she brought a comprehensive skill set encompassing enterprise architecture, business analysis and cybersecurity to ensure strategic and secure solutions for the Akademy.
