

Milos Vasic, BSc, MEng

Milos is a dynamic professional with a unique blend of expertise in economics and mechanical engineering, with a deep passion for IT development and entrepreneurship in the software industry. With a strong educational foundation in economics and mechanical engineering, Milos possesses a multidisciplinary perspective that fuels innovation and problem-solving activities.

Driven by a keen interest in the intersection of technology and business, Milos has honed exceptional skills in successful planning, implementation, management, and troubleshooting in IT support. His ability to navigate complex technical landscapes, coupled with a strategic mindset, enables delivery of efficient and effective solutions.

In the software industry, Milos has demonstrated a natural aptitude for IT development and an entrepreneurial spirit. He possesses a deep understanding of software development processes, leveraging their technical acumen and business acuity to drive the creation of cutting-edge solutions.

Milos brings a unique combination of academic knowledge, technical skills, and entrepreneurial spirit to MIRCE Academy, which drive innovation and success in the ever-evolving landscape of IT development and software business processes.
