

MIRCE Academy Public Lectures

Aviation Legends

The Boeing 747 Story

The jetliner which revolutionized the global air travels in the last four decades. The technology needed to build this amazing aircraft was developed over a very short period by engineers who didn't know it couldn't be done. This airplane was supposed to be a stop-gap between the Boeing jet aircraft like the 737 and the Supersonic jets, but it has grown into one of the most used and most loved airframes of all time. The Lecture covers the exciting story of the life of this remarkable aircraft from 1965 till today starting with its design followed by production, operation, maintenance, crashes and last modifications.

The Concorde Story

The contemporary of the Boeing 747, this Franco-British aircraft is still the only passenger jet which was able to cruise at a speed twice the speed of sound, in great comfort. Arguably the most beautiful flying machine ever made, started its life in 1957 with early theoretical studies. Fifteen years later and with a 10 fold budget over run it entered into scheduled service with British Airways and Air France. The Lecture covers the unique life of this one off aircraft through all its stages, including the Paris crash, until the very last touch down at Filton airport in 2006.

Voyage To The Ice

The lecture covers the research, preparation, planning and organisation of this great challenge followed by the events that took place during the 358 day long journey covering over 60,000 nautical miles in length, during 2003/ 2004. The “final landing” was in the aviation history books as:

- The first person to fly solo around the world via all seven continents
- The first woman to fly solo:
 - In a single engine light aircraft over the North Pole
 - In a single engine light aircraft over Antarctica

Individual Tickets are £10.00 per person per Lecture, which includes welcome coffee/tea and biscuits
Family Tickets are £25.00 for parents and kids per Lecture, which includes coffee/tea juice and biscuits
Discounts: £25.00 per person for all three Lectures and £60.00 per family for all three Lectures.
For group discounts please contact us on **01395 233 856** or by email: quest@mirceakademy.com

Dr Jezdimir Knezevic, the presenter is the “father” of the MIRCE Science and the Founder and President of the MIRCE Academy, at Woodbury Park. His multi disciplinary theoretical knowledge, huge industrial experience and an endless passion for the subject have attracted over 6000 engineers, managers, analysts and students to his courses and educational programmes in over 40 countries in Europe, Asia, Africa, North and South America and Australia, at universities, professional institutions, industry and government.
